

Year 1 Home Learning Maths Task

In the Autumn Term we learnt about the value of different coins and had a go at adding coins, up to £1, together (1p, 2p, 5p, 10p, 20p, 50p).

Choose some of your favourite toys and create a price tag for them. Play 'shops' with whoever you have at home! Take turns at being the shopkeeper and the customer, choosing something to buy and making the correct amount using coins.

If you fancy a challenge, have a go at writing number sentences for different coins! E.G. $2p + 1p = 3p$, $5p + 5p = 10p$, $10p + 2p = 12p$

You could even have a go at drawing the coins too!
